

Putt Pucks® ***from Dinamic Golf***

With so many putting gadgets on the market focussing on the perfect stroke we thought we'd get back to basics and help golfers focus on what really matters in putting – hitting the target.

Putt Pucks® ultimate putting system is a unique putting tool comprising three interlocking components, the central puck, inner puck and outer puck. The innovative 3-in-1 design allows the different components to be used either independently or combined to create literally dozens of different putting targets. Each system has three distinct uses:

- 1) An instant rebound tool giving you immediate feedback as to whether your putt was hit straight, pulled or pushed, leaving you free to concentrate on your stroke.
- 2) A putting target system with three pucks of decreasing size to be used either independently or together in literally dozens of different formations and challenges.
- 3) A cup size reducer with three different difficulty levels so once you've mastered your stroke you can challenge yourself to hit more accurate putts to find the hole.

Whether you choose to aim for the outer puck (standard golf hole size), inner puck (ice hockey puck size) or the central puck (just bigger than a golf ball) you will find that any time you practice with Putt Pucks the next time you hit the course you will "Hit the Target™" more often.

There are many different drills you can practice with your Putt Pucks® which are designed to be fun, addictive and ultimately great for your putting, allowing you to practice line, length or both combined. The more you play and practice with your Putt Pucks® the more drills you will find and with the positive focus of both the product and drills the more often you will "Hit the Target™" when you hit the course.

In addition to being great for your game, Putt Pucks® are also made bespoke for you. With our clever online colour selector tool you can create your own design encompassing your own favourite colour combinations. Furthermore, as a fully brandable product, not just in terms of colour but also the ability to add your logo or corporate messaging to each puck, Putt Pucks® also make the perfect corporate gift and their quality aluminium design is sure to impress your guests.
